

Condition assessment of RC structures is very much important to (i) enhance the service life, and (ii) reduce the frequent repairs and use of materials. So, the main focus of the webinar is on the assessment of quality, integrity and long term durability of RC structures with reference to rebar corrosion. CSIR-SERC invites you to join the free webinar. The goal of the webinar is to create an awareness among students, academicians, researchers and especially the real estate/construction industry towards the long term durability of RC structures against corrosion.

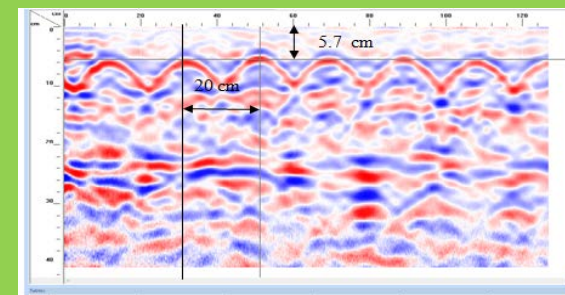

Speaker:

Dr. S. Bhaskar,
Senior Principal Scientist
CSIR-Structural Engineering
Research Centre (CSIR-SERC)
Email: bhaskar@serc.res.in

Research interests:

- Reinforced Concrete (RC) durability and service life enhancement of RC structures
- Condition assessment of RC structures using NDT and Advanced NDT Techniques
